# 1.0 Overview

Iridium's Direct Internet 2.0.2 Data Service allows customers to connect directly to the Internet via the Iridium gateway. While users are not required to load any special software onto their computer to connect, they will find additional compression and speed benefits from installing the Direct Internet 2.0.2 accelerator. However, the service utilizes standard dial-up networking and has been shown to work with a variety of operating systems, though only machines running Windows are supported. This documentation covers the manual installation of the Iridium phone as a modem and instructions on how to manually create a dial-up connection.

# 2.1 Modem Installation and Configuration

Prior to using your Iridium phone as a modem for Direct Internet 2.0.2, you must install the "Iridium PPP Data Modem" modem on your computer **(disregard this step for Windows Vista)** and set up and configure a dial-up networking connection.

## 2.2 Important Considerations

In the dial-up networking connection, TCP/IP should be the only enabled network protocol. You must have an available serial port on your computer (e.g., COM1). You must have Administrator privileges if using Windows NT, 2000, XP Professional and Vista. The Iridium.inf is automatically copied into the Windows\INF folder during setup. Users that have not run setup yet may extract the file from the downloaded executable or CD and copy it manually to the Windows\INF folder (disregard this step for Windows Vista.) If the "Iridium PPP Data Modem" is not available, the "Standard 19200 bps" modem can be used but must be configured with the following "extra initialization string", which sets the correct bearer service for the connection: AT+CBST=71,0,1

## 2.3 Windows 95/98 Setup

#### 2.3.1 Install the Modem

- 1. Close all applications.
- 2. Choose Start > Settings > Control Panel.
- 3. Double-click on *Modems*.
- 4. If a Modem Properties window appears, Click Add...
- 5. If you are using a laptop, you may be presented with a screen asking "*What type of modem do you want to install?*" Select the *Other* button and click *Next* >.
- 6. Choose the checkbox marked "Don't detect my modem; I will select it from a list" and then click *Next*.
- 7. From the Manufacturer list, highlight Iridium
- 8. Click Iridium PPP Data Modem to highlight it, and then click Next>.
- 9. Click on an available COM Port (e.g., *COM1*). This is the port to which you will connect your Iridium phone. Click *Next* >.
- 10. Click Finish.

### 2.3.2 Configure Dial-Up Networking

- 1. In Windows 95: Choose Start > Programs > Accessories > Dial-Up Networking In Windows 98: Choose Start > Programs > Accessories > Communications > DialUpNetworking
- 2. Double-click Make New Connection.
- 3. Enter a connection name (e.g., "Iridium").
- 4. In the "Select a device" pull-down menu, select the "Iridium PPP Data Modem", and then clickNext>.
- 5. Leave the Area Code box blank, and enter **008816000025** in the *Telephone number* box, and then click *Next* >.
- 6. Click Finish.
- 7. Right-click on your new dial-up connection and select Properties.
- 8. Uncheck the "Use area code and Dialing Properties" box.
- 9. Select the "Server Types" tab.
- 10. Uncheck "Log on to network", "NetBEUI" and "IPX/SPX Compatible".
- 11. Make sure the "TCP/IP" box is checked.
- 12. Click OK.

### 2.4 Windows Me Setup

### 2.4.1 Install the Modem

- 1. Close all applications.
- 2. Choose Start > Settings > Control Panel.
- 3. Double-click on *Modems*.
- 4. If a Modem Properties window appears, Click Add...
- 5. If you are using a laptop, you may be presented with a screen asking "*What type of modem do you want to install?*" Select the *Other* radio button and click *Next* >.
- 6. Choose the checkbox marked "Don't detect my modem; I will select it from a list" and then click *Next*.
- 7. From the Manufacturer list, highlight Iridium
- 8. Click Iridium PPP Data Modem to highlight it, and then click Next>.
- 9. Click on an available COM Port (e.g., *COM1*). This is the port to which you will connect your Iridium phone. Click *Next* >.
- 10. Click Finish.

### 2.4.2 Configure Dial-Up Networking

- 1. Choose Start > Programs > Accessories > Communications > Dial-Up Networking
- 2. Double-click Make New Connection.
- 3. Enter a connection name (e.g., "Iridium").
- 4. In the "Select a device" pull-down menu, select the "*Iridium PPP Data Modem*", and then click *Next>.*
- 5. Leave the Area Code box blank, enter **008816000025** in the *Telephone number* box, and then click *Next* >.
- 6. Click Finish.
- 7. Right-click on your new dial-up connection and select *Properties*.
- 8. Uncheck the "Use area code and Dialing Properties" box
- 9. Select the "Networking" tab.
- 10. Uncheck "NetBEUI" and "IPX/SPX Compatible".
- 11. Make sure the "TCP/IP" box is checked.
- 12. Click the "Security" tab and uncheck the "Log on to the network" box.
- 13. Click OK.

### 2.5 Windows NT4.0 Setup

#### 2.5.1 Install the Modem

- 1. Close all applications.
- 2. Choose Start > Settings > Control Panel.
- 3. Double click on *Modems* then click Add...
- 4. Choose the checkbox marked "Don't detect my modem; I will select it from a list." Then, click Next >.
- 5. From the Manufacturer list, highlight Iridium
- 6. Click Iridium PPP Data Modem, and then click Next>.
- 7. Click the "Selected ports" radio button. Click on an available COM Port (e.g., COM1). This is the port to which you will connect your Iridium phone. Click Next >.
- 8. Click Finish.
- 9. Click OK, Close.
- 10. The Modem Setup window appears and asks if you would like to configure Dial-Up Networking. Click Yes.
- 11. The Remote Access Setup window appears. Note: If a modem is already installed on the COM port that you would like to use, select the modem in the list and click *Remove*.
- 12. Click Add and select the "Iridium PPP Data Modem" from the list of RAS-capable devices. Click OK.
- 13. The new entry is added to the list of modems. Click *Continue*.
- 14. When asked if you would like to restart the computer, click Yes.

### 2.5.2 Configure Dial-Up Networking

- 1. Choose *Start > Programs > Accessories > Dial-Up Networking.* If Dial-Up Networking has no "phonebook entries", you will be prompted to "Press OK to add an entry".
- 2. Click New ...
- 3. In the Entry name box, enter a connection name (e.g., "Iridium").
- 4. In the Phone number box, enter 008816000025
- 5. Uncheck the "Use Telephony dialing properties" box.
- 6. In the Dial using list, select "Iridium PPP Data Modem"
- 7. Select the Server tab.
- 8. Make sure "TCP/IP" is checked and uncheck "IPX/SPX compatible", "NetBEUI".
- 9. Click OK, Close.

### 2.6 Windows 2000 Setup

#### 2.6.1 Install the Modem

- 1. Close all applications.
- 2. Choose Start > Settings > Control Panel.
- 3. Double click on Phone and Modem Options.
- 4. Select the Modems tab and click Add...
- 5. Check "Don't detect my modem; I will select it from a list." Then, click Next >.
- 6. From the Manufacturer list, highlight *Iridium*
- 7. Click Iridium PPP Data Modem, and then click Next>.
- 8. Click the "Selected ports" button. Click on an available COM Port (e.g., COM1). This is the port to which you will connect your Iridium phone. Click Next >.
- 9. Click Finish.

### 2.6.2 Configure Dial-Up Networking

- 1. Choose Start > Programs > Accessories > Communications > Network and Dial-up Connections.
- 2. Double-click Make New Connection and click Next>.
- 3. Select "Dial-up to private network" and click Next>.
- 4. If a "Select a Device" window appears, check the box next to "*Modem Iridium PPP Data Modem*", and uncheck all other devices. Click *Next*>.
- 5. In the Phone number box, enter 008816000025 and click Next>.
- 6. Choose either "For all users" or "Only for myself" and click Next>.
- 7. Enter a name for your connection (e.g., "Iridium") and click *Finish*.
- 8. Click Properties.
- 9. Click the *Networking* tab.
- 10. Make sure "Internet Protocol (TCP/IP)" is checked. Uncheck all other components.
- 11. Click OK.
- 12. Close the connection box.

### 2.7 Windows XP Setup

#### 2.7.1 Install the Modem

- 1. Close all applications.
- 2. Choose Start > Control Panel.
- 3. Double click on Phone and Modem Options.
- 4. Select the Modems tab and click Add ...
- 5. Check "Don't detect my modem; I will select it from a list." Then, click Next >.
- 6. From the Manufacturer list, highlight *Iridium*
- 7. Click Iridium PPP Data Modem, and then click Next>.
- 8. Click the "Selected ports" button. Click on an available COM Port (e.g., COM1). This is the port to which you will connect your Iridium phone. Click Next >.
- 9. Click Finish.

### 2.7.2 Configure Dial-Up Networking

- 1. Choose Start > All Programs > Accessories > Communications > Network Connections.
- 2. Click "Create a new connection".
- 3. Click Next>.
- 4. Select "Connect to the Internet" and click Next>.
- 5. Select "Set up my connection manually" and click Next>.
- 6. Select "Connect using a dial-up modem" and click Next>.
- 7. If a "Select a Device" window appears, check the box next to "*Iridium PPP Data Modem*", and uncheck all other devices. Click *Next*>.
- 8. Enter a connection name (e.g., "Iridium Direct Internet 2.0") and click Next>.
- 9. In the Phone Number box, enter 008816000025 and click Next>.
- 10. If using XP Professional Edition, a window may appear to select either "*Anyone's use*" or "*My use only*". Choose an either selection and click *Next*>.
- 11. A username and password are not necessary. Click Next>.
- 12. Click Finish
- 13. Click Properties.
- 14. Click the Networking tab.
- 15. Make sure "Internet Protocol (TCP/IP)" is checked. Uncheck all other components.
- 16. Click OK.
- 17. Close the connection box.

### 2.8 Windows Vista Setup

During any of the following steps, you may be required several times to approve access by Windows UAC (User Account Control). When prompted, choose *Continue*.

#### 2.8.1 Install the Modem

- 1. Close all applications.
- 2. Choose Start > Control Panel.
- 3. Double click on Phone and Modem Options.
- 4. Select the Modems tab and click Add.
- 5. Check Don't detect my modem; I will select it from a list. Then, click Next >.
- 6. From the Manufacturer list, highlight Standard Modem Types
- 7. In the right pane click Standard 19200bps Modem, and then click Next>.
- 8. Click the Selected ports button. Click on an available COM Port (e.g., COM1). This is the port to which you will connect your Iridium device. Click Next >.
- 9. Click Finish. Close all windows except Control Panel.
- 10. From Control Panel Double Click Phone and Modem Options
- 11. Click Modems tab, then Properties, then Change Settings, then the Advanced tab.
- 12. Add Initialization String: AT+CBST=71,0,1 and click OK.
- 13. Modem addition and setup complete. Close the Phone and Modem Options window.

### 2.8.2 Configure Dial-Up Networking

- 1. Choose Start > Control Panel Double Click on Network and Sharing Center.
- 2. Click Set Up a Connection or Network (upper left).
- 3. Choose Set Up a Dial-Up Connection. Click Next>.
- 4. In the Dial-Up Phone Number field, type: 008816000025
- 5. Leave *User Name and Password* fields blank, In the *Connection Name* field create an appropriate name for the connection (e.g. Iridium Data).
- 6. Click Connect then Skip and choose Set Up The Connection Anyway. Click Close.
- 7. Return to the *Network and Sharing Center* and choose *Manage Network Connections* (upper left) to initiate call dialing.

# 3.1 Dialing a Call

To place a PPP Data call, you must open the Dial-Up Networking window and select the dial-up connection you created for your Iridium phone.

- 1. Connect the computer and phone.
- 2. Orient the phone's antenna with a clear view of the sky.
- 3. If your computer is turned off, turn it on and wait for it to boot up.
- 4. Turn on your Iridium phone and wait for it to register with the satellite network.
- 5. Depending on your Windows operating system, choose one of the following to open the Dial-Up Networking window:
  - a. Start > Programs > Accessories > Dial-Up Networking
  - b. Start > Programs > Accessories > Communications > Dial-Up Networking
  - c. Start > Programs > Accessories > Communications > Network and Dial-up Connections
  - d. Start > All Programs > Accessories > Communications > Network Connections
  - e. Start > Connect To > Select Connection Name >

- 6. For Windows 95/98/Me/2000/XP/Vista, double-click the dial-up connection you created (e.g., "Iridium" or Iridium Data), and then click *Connect* or *Dial*. (Note: A username and password are not necessary, and anything in these fields will be ignored). For Windows NT, select your connection from the drop-down list (e.g., "Iridium"), and then click *Dial*. When prompted to enter a username and password, click *OK*. (Note: A username and password are not necessary, and anything in these fields will be ignored).
- 7. As the Iridium phone is dialing, it will blink "Data Call-In Progress" and a Dial-Up Networking window will appear on your computer showing the current status of the connection.
- 8. Once connected, the handset will continue to display "Data Call-In Progress," but it will no longer blink.
- 9. Once authenticated, a dial-up networking session is established, and the dial-up networking icon will appear in your taskbar.
- 10. You can now launch your Internet application.
